PROFESSIONAL SUMMARY

Computer Science and Engineering graduate (CGPA: 8.2/10) with hands-on experience in Python, software development, AI/ML, Generative AI, LLMs, backend development, and data analysis. Seeking an entry-level technology role where I can apply Python, REST APIs, SQL, machine learning, Generative AI, LLM concepts, debugging, and problem-solving skills to build reliable and intelligent software solutions.

KEY SKILLS AND STRENGTHS

AI/ML & GenAI: Generative AI, LLMs, AI Agents, RAG, Prompt Engineering, Machine Learning, NLP, Computer Vision, Vector Embeddings, Semantic Search, YOLOv8, Scikit-learn
Programming: Python, Java (Basic), C
Software Engineering: Data Structures & Algorithms, OOP, Problem Solving, Debugging, Testing, Git, GitHub Backend &
Web: Flask, FastAPI, React.js, Spring Boot, REST APIs, HTML, CSS
Data & Databases: SQL, MySQL, MongoDB, Pandas, NumPy, Matplotlib

PROJECTS AND EXPERIENCE

AI Enterprise Knowledge & Workflow Agent

- Built a Generative AI/LLM knowledge assistant using RAG, vector embeddings, and semantic search for enterprise document retrieval.
- Developed Python-based AI agent workflows for knowledge retrieval, database interaction, and automated task execution.

AI SQL Analytics Agent

- Developed an LLM-powered Text-to-SQL agent that converts natural-language questions into SQL and retrieves insights from MySQL databases.
- Built a Python/FastAPI backend with AI agent workflows, SQL validation, data analysis, and automated response generation.

CAPTCHA Secure Authentication System

- Built a secure authentication system using React.js, Flask, Spring Boot, MySQL, and YOLOv8 with image-based CAPTCHA verification.
- Integrated computer vision, OTP-based recovery, user verification, and failed-attempt protection.

PROFESSIONAL EXPERIENCE

Python with Data Science Intern
Drive Torq Mission Tech Solutions | Feb 2026 – May 2026

- Developed Python-based data analysis tasks using Pandas and NumPy.
- Tested and debugged code to identify and resolve implementation issues.
- Worked with structured datasets and practical software development workflows.
- Strengthened problem-solving and technical communication through project-based development.

EDUCATION

ATME College of Engineering, Mysore
B.E. Computer Science and Engineering | 2022–2026
Narayana e-Techno School, Chennai
CBSE – PCMC | 2019–2022
75%

CERTIFICATIONS & WORKSHOPS

AI FLUENCY FRAMEWORK & FOUNDATIONS — ANTHROPIC, JUL 2026
MICROSOFT LUXOR WORKSHOP — PARTICIPANT
SMART INDIA HACKATHON (SIH) — PARTICIPANT
